10 Years International Cooperation
2000-2010 on Airport Surveillance

Welcome to the „10 Years ICAS“ celebration at Eurocontrol, Brussels.

It's time to look back a little bit to see what ICAS has achieved so far. We started with 20 members at our first meeting in Amsterdam on October 17 2000. 10 years later many of you are now operating an A-SMGCS system. And still more and more airports are joining ICAS thus creating a pool of knowledge and exchange with more than 150 members at the moment.

It's also important to look forward and to see all the new technology on the market, which makes our systems better and better.

I would like to say thank you already by now to the Organization Committee. You will see, they have done and are still doing an unbelievable good job. The organization of this celebration would not have been possible without the support of our Industry Partners. Many thanks to them as well. I really feel excited and I am looking forward to see old and new friends, rest for a moment and celebrate, listen to very interesting presentations, have a look to the newest technologies and as always: have great discussions.

See you all in Brussels!

Guido Deplazes
ICAS Chairman
